## Precautions on using the device

1.This product is a sophisticated electronic device; please pay more attention to the usage:

2. Keep the product away from electromagnetic environment please.

3. When storing or carrying the product, please be careful not to press or squeeze the product.

4. When storing or carrying the product, keep it away from damp environments. The product should not be subjected to dripping or splashing water.

5. Do not clean the product with water or other chemical agents，clean the surface with soft cloth please.

6. Please do not use excessive force to press keys of the e-book.

7. Please do not put the e-book under sunshine directly. Keep it away from environments in high or low temperature.

8. Please do not shake or strike the e-book severely, and avoiding accidents such as falling.

9. In order to protect your hearing, do not adjust the volume too high (doctors point out that prolonged use of high volume will damage listener's hearing). When tinnitus occurs, please lower the volume or stop using.

10. When the expansion card is inserted, please pay attention to the tips marked on the product, do not counter insert the card or plug it too vigorously, in case to damage the slot.

11. In order to avoid heating, please do not connect the USB to PC for too long. Pull out it from USB interface while not use.

12. Please do not use the product in environments such as heat, cold, dusty, wet and dry.

13. When the E-book is being formatted or in the progress of uploading and downloading, please do not stop it, otherwise the documents will be damaged.

14. subject to changes because of product performance and functionality without notice.

15. When this machine is used as a portable hard disk, please store and export the file according to correct file management operation method; incorrect operation method may cause files missing, our company will not be responsible for this.

16. Please make 'Disk Defragmenter' regularly. Connecting the e-book and PC with the USB cable attached, formatting the E-book with windows operating system after the PC matches it. (Formatting will clear away all the data inside E-book. So please make a backup before formatting.)

17. Due to the difference of the capacity calculation, FAT partition table of the firmware and FLASH memorizer of the e-book take certain space. There will be certain differences between the memory capacity marked in machine and the one showed in PC. It depends on the firmware version of specific machine and its FLASH category. It is normal to meet with situation like this.

18. There are so many viruses in current computers that may damage the documents and firmware programs easily. Please strengthen anti-virus. If the e-book has been infected and cannot be used, please upgrade firmware in a computer without virus, and to format disk.

19. Our company will not make the responsibility for the documents missing which caused by damage, maintenance or other reasons like this.

20. Please follow the manual to operate and make a backup for important data in common.

21. Please do not use the product in electronics forbidden areas.

22. Charging Precautions:

a) The product runs with reusable polymer lithium batteries. We advise you to charge for this product for full 8 hours for the first several times. It will extend the using life if you making recharge after using out the batteries.

b) Please keep on charging for half an hour more after filling the product which will support longer time playing.

c) The lithium battery is supposed to replace by customer service. It can only be replaced by the same kind of battery. Users can not replace by themselves own.

d) The using life of batteries will be different for different using situations or different production times.

23. Two ways of charging:

e) To charge by USB interface on PC. It will be in charging once matching E-book with computer no matter the product is power on or off.

f) To charge via a compatible charger (adapter). It will start to charge after connecting the power line to electricity supply and matching the other side to the player adapter.

g) It is normal once you find the product is heating-up during the whole charging progress.

Attention: power off and charge, connect the charger under power on, press ⏻ key about 5s,the machine will enter charging

condition automatically.

There will be some differences between manual and true function which caused by updated software. Please take the product you buy as final and binding, the guide is only for reference.
  (The product is non-water-proof)
Our company keeps the right to improve the product on specification and design. We apologize for not give you notice once to make change.

## Explanation of the battery and power supply

11.1 When the machine is in charging state, the top right will show the charging icon ▱, after fool charged, the icon will switch

to full power icon ▮▮▮▮ automatically.

11..2When the battery is run out, it shows ▭, the system will prompt low voltage. Please charge in time then.

11..3 When you charge for the product for the first time, in order to maximize the state of the battery, it is recommended to charge with power off and keep for more than 8 hours.

11.4 The new product should be full charged and full released for the first three times to activate; after that, it takes about 3-3.5 hours to fully charge the battery; it requires a longer charging time in running state.

11.5 It is recommended to fully charge and fully release the battery once every 3 months, to maintain the lithium battery.

11.6 After charging, please disconnect the USB cable, and remove the charger from the electric outlet. Please do not insert the charger into the electric outlet when the product is not connected.

11.7 If the machine is not in use for a long time, please fully charge the battery first, charge and release once every 3 months.

11.8 When the power is in sufficient, please continue to use after charging; when the battery is completely dead, please use the charger to recharge the machine then connect to PC; please charge in the following situations:

A. While the battery icon shows out of battery.

B. The system shut down automatically, and shut down soon after starting up again.

C. No responding of operations to keys.

D. In order to ensure the stability of charging, it is recommended not to charge with USB of PC. Try to use the standard charger to recharge.

## Troubleshooting

1. E-book cannot be turned on?

A: Connect USB or the charger, to check whether the battery voltage is too low. If so, please recharge a period of time before using.

If after charging the machine still cannot be turned on, please contact with our customer service.

2. Q: hear nothing by earphone?

A: Please check the volume is 0 or not.

3.Q:here are so much noisy.

A: Please check if the plug of earphone is clear or not,the stain on earphone may cause noise.

4. Q: Files cannot be downloaded?

A: Check if the PC and the player are connected correctly.

Check if the storage space is full.

Check if the USB cable is damaged.

5. Q: How to solve the system crash of the player?

A: If the crush occurs during operation, click the Reset button to restore.

In order to prevent crash, please pay attention not to operate too fast while pressing keys, it is recommended to operate one by one;

On the other hand, please charge in time when the battery power is insufficient.

6. Why the running time of reader varies?

Running time of polymer lithium battery may vary because of different temperature of environment and different using conditions.

When use the product, if the environment temperature is too high or too low, the running time of battery may be effected. It is recommended to use the product in normal temperature.

For the running condition, because of increase volume, frequent operations, frequent starting-up and shutting-down, the actual running time would vary in certain degree
