## 五 Troubleshooting

### 1. To solve the problem, please follow the instructions.

- If malfunction appears, please follow the below instructions.
- Try again: If it cannot read media cards or USB flash drive, please reinsert.
- Reset: Please re-plug the power adapter, and start the device.

### 2. Problem & Solution:

Problem	Solutions
No display on screen and can not start up	Check whether the power is connected well, and whether the device is powered on. Check whether the battery is low (battery version).
No sound	Whether the parameter of volume is set to 0
The picture is dark.	Check the setting of brightness is in normal value.
Can not read USB flash drive / Medium cards	Check whether USB flash drive/media card is inserted well.
The remote control is invalid	The distance between remote control and the device is too long or the angle is more than 60°. Check whether the remote control is poor contact or the battery is low.
Picture can not full-screen display	The screen ratio of this device is 16:9, if you want full-screen display, please adjust the picture ratio to 16:9 as well.

- Note: The LED panel is made up by 561000 pixels with high technology. By chance, there will be some pixel is too high or too dark, but this situation will not effect the actual Digital Photo Frame function.
