Viewing Modes

Press this button to select display mode of FILL, ORIGINAL, AUTO FIT and PAN SCAN.

File Saving:

Photos must be saved in **JPG** format in order to be viewed on the digital picture frame, Nearly all digital cameras will save in the format by default. Photos that have been saved with certain image editing programs can fail to display properly.

Technical Notes:

- 1. Your digital picture frame is sophisticated electronic device. Do not drop or subject the unit to jarring or strong vibrations.
- 2. Avoid placing the digital photo frame in areas of high humidity or where it might be subjected to splashing
- 3. The LCD panel is made of plastic and can be easily damaged. Avoid sharp objects.
- 4. Use only a soft dry cloth to clean the screen.

Questions/Troubleshooting Guide

- Question: what kind of photos does this device support? Answer: The frame will display digital photo that are stored in the JPEG format, which is the standard format for nearly all digital cameras. Some cameras allow images to be stored as TIFF or RAW files as well as JPEG Only the JPEG format is compatible with the frame. Photos of up to 10 million pixels can be display
- 2. **Question:** What should I do if the system does not respond when the power is turned on **Answer:** Please make sure the unit is properly connected to a power source. The turn it off, re-connect the power and turn in on again.
- Question: Why is the memory card not recognized? Answer: The memory card might be inserted backwards or is not pushed in for enough. After inserting the memory card in the right direction, if the card still cannot be read, please turn off the unit and then power it on again.
